Stainless Steel Shields and Instruments

The Cox® II ocular shield:

To protect the patient and personnel from the laser and IPL, Oculo-Plastik offers a wide variety of stainless steel laser shields and instruments. Their non-reflective surfaces disperse laser and other sources of energy. Autoclavable, these are durable, low maintenance instruments.

The most popular, is the COX II ocular laser shield.

• Designed to conform to the globe, with a vault over the cornea. The posterior surface and the rounded edges are highly polished to assure patient's comfort and safety during wearing time as well as during insertion and removal.
• With no bulky and heavy handle, each shield includes a latex-free suction cup, for easy insertion and removal. The Cox II, with suction cup, is ideal for blepharoplasty.
• These elongated shields have an improved non-reflective front, which offers, the personnel even more protection from the laser.
• Cox II® is 1mm thick; double the thickness of the original Cox®.

In four sizes:
21-261 x-small, 22 x 19.5mm
21-262 small, 24 x 21mm
21-264 med., 25.5 x 23mm
21-266 large, 27 x 24mm

The unilateral model with handle makes it easier to insert and remove. The handle may interfere with certain procedures. Sold as a unit.

• Up to 50 cycles in the autoclave.
• All shields available in black or transparent yellow.
• The black shield blocks all light and vision.
  – Our TOP SELLER.
• Yellow allows seeing pupil. Best for general anaesthesia and claustrophobia.
• All shields are available in 4 sizes.

All plastic shields packaged as a single unit:
• One bilateral ocular shield with one suction cup.
• One bilateral ocular shield with handle.
• One unilateral with handle (either left or right).
Cox® II Insertion and removal examples

Insertion with fingers
Insertion with suction cup
Removal with suction cup

Note: Most speakers suggest a topical anesthetic and an ophthalmic ointment for the patient's comfort and safety.

Cox® II H*, with offset handle

- Like the Cox II, the Cox II H is also vaulted at the cornea, is marked for size and has a safety ring at the edge.
- The posterior surface and the edges are well rounded and polished, i.e. of exceptional quality to avoid hurting the patient and for his/her comfort.
- The Cox II H with offset handle facilitates insertion and removal. The handle is near the lower lid to allow closure without the upper lid pressing on the handle and causing rotation or displacement of the shield, minimizing risk of corneal irritation or exposure of the globe.

Now in four sizes, left and right:
21-261H L or R, x-small 22 x 19.5 mm
21-262H L or R, small 24 x 21 mm
21-264H L or R, medium 25.5 x 23 mm
21-266H L or R, large 27 x 24 mm

Medial

Bilateral model with suction cup is ideal for blepharoplasty.
Model with bilateral handle can be used in either eye and they are easier to insert and remove. The handle may interfere with certain procedures.

Suction cups
For easy insertion and removal of ocular protective shields.
Available by the dozen. Can be autoclaved. Latex-free rubber.
23-012 (1 dozen)
Durette® externals
laser shields in metal

For skin resurfacing, hair removal, ablative and nonablative treatments or IPL, etc. The non-reflective surfaces of stainless steel disperse laser and other sources of energy.

Durette® II externals

• 1mm all-stainless-steel, simple, strong and practical design.
• They completely block direct light. The patient will feel safer.
• Adjustable headband means comfort for the patient.
• When treating crow’s-feet, the elastic can be moved up or down.
• They do not pressure the globe. The patient can open eyes to position external shields.
• Easily cleaned surfaces. Can be cleaned with alcohol.
• Autoclavable.
• Replaceable headbands.

Treated inside to diffuse laser light

Excellent results with long varicose vein removed.

Dubois Twistrripper: Varicose Vein Strippers
A1-320 - Dubois Twistrripper 200 mm (1 unit)
A1-330 - Dubois Twistrripper 300 mm (1 unit)
Dubois Twistripper. 
To facilitate varicose veins removal.

Durette® III externals*
with movable plastic nasal and temporals

Complete exposure of the glabella, nose, and crow’s-feet.

• Both the nasal and temporal pieces can be moved away from area to be treated, without affecting proper shields’ position.
• Metal cups (regular or small) with clear plastic attachments.
• Choice of using temporal pieces or hook for direct attachment of the elastic.

21-445, regular or 21-442, small. Durette® III external laser shields, all stainless steel, with mobile clear plastic attachments. Includes 1 assembled pair external shields and extras. Total parts comprise 2 metal cups, 4 nasal and 4 temporal plastic attachments, 2 elastic headbands and the black case.

Replacement clear plastic parts (not autoclavable).
21-440 Replacement plastic attachments, 4 nasals and 4 temporals.
21-440N Replacement plastic attachments, 10 nasals.
21-440T Replacement plastic attachments, 10 temporals.
21-536 Spare black elastic headbands (5)
21-537 Spare white elastic headbands (5)

(*US Patent #7,188,625), also patented in Canada & other countries. Other international patents pending.)
Durette® IV externals*  
with movable metal nasal and temporals

• Both the nasal and temporal pieces can be moved away from area to be treated, without affecting proper shields’ position.
• Metal cups (regular or small) with metal attachments.
• Choice of using temporal pieces or hook for direct attachment of the elastic.

21-555, regular or 21-552, small. Durette® IV external laser shields, with mobile metal attachments. Includes 1 assembled pair external shields and extras. Total parts comprise 2 metal cups, 2 nasal and 2 temporal metal attachments, 2 elastic headbands and the black case.

Replacement metal parts.
21-550/N Replacement metal attachments, 2 nasals.
21-550/T Replacement metal attachments, 2 temporals.
21-536 Spare black elastic headbands with cordlock (5)
21-537 Spare white elastic headbands with cordlock (5)

(*US Patent #7,188,625), also patented in Canada & other countries. Other international patents pending.)

The InView bifocal lenses.

• The InView is a prescription/cheater insert that fits behind your glasses.
• Designed for most frame types including sunglasses, and safety eyewear.
• Unique design is flexible, and fits securely into most frames with no movement.

IVR-IR150 InView frame with x1.50 lens
IVR-IR200 InView frame with x2.00 lens
IVR-IR250 InView frame with x2.50 lens
IVR-IR300 InView frame with x3.00 lens
IVR-IRRIM InView frame only

Hydrotac® is a registered trademark of NEOPTX LCC, USA.
The SUTCLIFFE shields, with all surfaces nonreflective for safe use with the laser, come in many configurations for various applications. The same basic piece is available modified in design to shield different parts of the body. You can shield eyelashes, eyebrows, eyelids, freckles, lips, gums, teeth, etc. and any tissue (deep or superficial) needing protection. Useful during skin resurfacing, incisional procedures, skin depigmentation, etc. In surgery, they can serve as an instrument for retracting tissue and as a backstop. You will discover many uses for it. The bent model is easier to pick up when gloved.

21-275 Sutcliffe laser shield (flat)          21-276 Sutcliffe laser shield (bent)

Sutcliffe shields and retracting instruments

With non-reflective surface to protect from the LASER

Stainless steel instruments for retracting tissue, for shielding lashes, brows, lips, teeth, lobes, tissue, etc.

These frames are available in a wide variety of wavelength filters that cover the full spectrum of laser applications.

Choose the frame that best suits your needs and we will help you choose the correct filter, according to the wavelength of your system.

Model # 34 is available with inserts for prescription lenses.

Model # 39 is a fit over model that can be worn alone or over prescription eyewear.

Contact us for all your eye protection requirements.

Sutcliffe perforated laser shields

SUTCLIFFE-BOEY lesions and freckle shield. To limit the size of the laser beam.

The SUTCLIFFE shields, with all surfaces nonreflective for safe use with the laser, come in many configurations for various applications. LaserSecure® skin resurfacing, hair removal and blepharoplasty instruments.

DAVID-BAKER LID CLAMPS
The easy-to-use David-Baker retractors feature a simple, curved clamping mechanism to gently retract the upper eyelid while protecting sensitive scleral membranes.
21-322 D-B lid clamp (small, 24mm)
21-323 D-B lid clamp (large, 32mm)

CASTROVIEJO

CASTROVIEJO

DESMARRES RETRACTORS
Desmarres retractors for the laser
21-310 (10mm), 21-312 (12mm), 21-314 (14mm), 21-316 (16mm), 21-318 (18mm)

FOMON BALL RETRACTOR
21-319 Fomon ball retractor for the laser. All non-reflective.

KNAP RETRACTOR
28-010 Knap retractor for the laser. All non-reflective.

SKIN HOOK RETRACTORS
28-012 2 prongs, sharp, retractor for the laser. All non-reflective.

BISHOP HARMON FORCEPS
25-224 Bishop-Harmont forceps for laser (12cm-4 3/4"

MOSQUITO FORCEPS
25-222 Hartman Baby Mosquito forceps for laser (9cm - 3 1/2", curved)

THE "LASER SWAB"
21-209 Stainless steel tissue handler and backstop. With 2 tips (3/16" & 1/4", 5.0mm & 6.5mm).

Warning: OP Slims2 may only be used for IPL treatments and only by IPL-trained personnel. Please correctly dispose the product at the end of its lifetime. Cleaning is done easily by using a non-abrasive cloth.

Please note: The sensor requires an unobstructed field of view. Storage temperatures range from -10˚ to +40˚C, temperatures for short-term use range from -10˚ to +70˚C. Prolonged use at temperatures outside of this range may cause damage and is not covered by the warranty. Should irregular functions or visible damage occur, please do not use the glasses anymore.

High Vision Pulse HVT (for IPL only)

Safety eyewear that reacts automatically to IPL.
Filter darkens in less than a millisecond.

- Minimizes headache and other adverse effects associated with IPL glare.
- Allows you to work safely and efficiently while providing good color acuity.

With a clearer lens for accrued visibility.

# PULSE-HVT
Danger of breakage. These OP Slims2 safety glasses are not regular glasses and therefore, they need to be treated carefully. You are working with a high tech product, which is made out of electronics and liquid crystal cells. Please note the following hints! The insert is made light weight to be comfortable and consequently is fragile and may break if dropped or if it is pulled/twisted at one of the darkening lenses (to remove the inserts). Please inform all users that it must be handled with great care. See these photos showing DO's and DON'Ts and our videos on our web site on how to safely replace insert and other parts.

---

The Khan-Jaeger

21-292 Khan-Jaeger lid plate.
A more concave ergonomic design, with the inside polished. – You’ll love it!

The Jaeger

21-295 Jaeger lid plate.
The flatter standard shape, with the inside polished.

Gray laser blepharoplasty kit

26-001 • Includes: 2 Cox II med., 2 Cox II large, 4 suction cups, 2 Desmarres (1-12mm & 1-14mm), 1 Snelliche flat, 2 David Baker lid clamps (1 large & 1 small), 3 Castroviejo instruments (1 curved needle holder, 1 suturing forceps (0.9mm) & 1 caliper), 1 Adson 1-2 forceps, 1 Khan-Jaeger lid plate and a large plastic sterilizing tray.
• See price list for BONUS offer. Variations in the kit are possible.

---

Autoclavable plastic sterilizing trays.

See price list for sizes available.

Suction cups

For easy insertion and removal of ocular protective shields. Available by the dozen. Can be autoclaved. Now in latex-free rubber. 23-012 (1 dozen)
The **OPS•ft** mouthguard*

For protection during hair removal and cutaneous treatment with Laser, IPL, IPL/RF, Laser/RF, and RF:

- Eliminates pain of the teeth, gums, and buccal mucosa caused by the laser fluence and other energy.
- Insulates from electrical current produced by radio frequency.
- The soft rubbery polymer easily conforms to the buccal area. Even for patients with small features, there is no need to have the teeth touch.
- May be used over dental braces, repairs and implants.

- Eliminates pain and insures protection while dispersing or insulating the energy and avoiding penetration.
- Spot test the OP•ft soft mouthguard with any new energy device before use.
- Documented results have proven safe and painless.

(*US Patent #6,681,771, also patented in Canada & other countries.)

Single use. 10 per pack. #60-104

---

**Accessories/Spare Parts:** A cover lens made of high-quality plastic protects the OP Slims2. You can replace it simply by pulling it out and interchanging it for a new one. All spare parts such as the frame, cover lens and insert are very easy to change provided care is taken. They can also be ordered separately. The OP Slims2 have been certified as a combination. The active autodarkening insert is not intended to be used without cover lens.

**Warranty:** The warranty against material and manufacture defects amounts to 36 months from date of issuance of the invoice. This excludes damage due to improper use. The warranty applies only for unchanged products. Outside of the warranty exchange of a product, no further damage is covered.

Code: OP SLIMS2
All Stick-On Eye Shields are easy to apply, allows access to nose bridge, brow and temples plus are latex free and hypoallergenic.

- Filter darkens in less than one millisecond.
  - The OP Slims2 switches to dark at every single IPL-pulse.
  - Extremely clear optics allow full color perception.
  - Performing cosmetic treatments safely and without fatigue.
  - Protects against infrared and ultraviolet, even in the light state.
  - No maintenance during the entire life cycle.
  - Allows you clear vision of all colors during treatment. Skin conditions can be seen much better.
  - OP Slims2 weigh only 42 grams.
  - The spectral protection ranges from 200-3000 nanometers, which is is well above the standard requirements.
  - Operation is simple: Just put them on and start working!
  - Built-in lithium battery.
  - Without an on/off switch, the lifetime for average use ranges from 3 to 4 years.
  - OP Slims2 are tested with the latest standards and CE-certified according to ISO12609.

Disposable Stick-Ons
For various applications:

**Laser-Aid™ Laser Eye Shields**
- Laser-safe for medical lasers with wavelengths between 190nm-11,000nm
- Protection level: (OD>7@190-11,000nm)

**IPL-Aid™ IPL Eye Shields**
- For non-laser use only
- Opaque inner layer to shield IPL

**LED-Aid™ LED Eye Shields**
- For non-laser use only
- Safe for use with LED's, low-powered lasers (< 1 watt), IPL and microdermabrasion devices
- Protection level: (OD 4 @ 190nm - 10,600nm)

**Derm-Aid™ Dermabrasion Eye Shields**
- For non-laser use only

31-8300 (24 pairs / box)
31-9300 (50 pairs / box)
31-8400 (50 pairs / box)
31-7300 (50 pairs / box)
Durette® plastic & Black Durette II plastic external* shields

With movable plastic nasal and temporal attachments.

NOT FOR USE WITH LASER, FLASH LAMP or IPL.

Like the Durette® III, but all in plastic. Not autoclavable. Now in 2 styles, original size in black and white and new larger and thicker Black Durette II plastic.

**Ball and socket design.**

*CUS Patent #7,188,625, also patented in Canada & other countries. Other international patents pending.*

**CAN BE USED WITH:**
Light emitted by fluorescent lamps, bright LEDs or dichroic filament bulbs.
Visible violet light in the range of 405-420.
Light therapy for skin conditions like psoriasis or eczema, which use UVA or UVB phototherapy.
PUVA treatment.
Light therapy by red and/or near infrared (NIR) LEDs.
Photodynamic Therapy (PDT) light sources.
Narrowband Light emitting Diodes (LEDs) - Optimized, via a matrix of LEDs.

They SHOULD NOT BE USED with lasers that irradiate a coherent light beam (spectral irradiance of any wavelength) or any flash lamp or IPL system that operates in burst modes that comprise multiple trains of pulses. They should not be used with high-power, spectral irradiance in the UVB and UVA wavebands or any other spectral irradiance energy or light source.

Use the color black or white according to the output wavelength / waveband of your machine. The black eye shields provide a wider range of coverage than the white.

Durette® Plastic external shields.
For BLACK shields:
OD +5 @ 190-2575 nm,
OD +4 @ 2576-3000 nm

For WHITE shields:
OD +5 @ 190-590 nm,
OD +4 @ 591-682 nm

Black Durette® II Plastic external shields.
OD +5 @ 190-2575 nm ;
OD +4 @ 2576-3000 nm ;
OD +4 @ 3001-10,600 nm:

Complete exposure of the glabella, nose and crow's feet.

• Both the nasal and temporal pieces can be moved away from area to be treated, without affecting proper shields' position.

• Black or white plastic small external shields with mobile clear plastic attachments.

• Black shields come with black elastic and white shields come with white elastic.

Durette® Plastic external shields. Smallest original design.
23-442B (BLACK) and 23-442W (WHITE)

23-445B, larger and thicker.

All with mobile clear plastic attachments. Includes 1 assembled pair external plastic shields. Total parts comprise 2 plastic cups, 1 nasal and 2 temporal plastic attachments, 1 elastic headbands and a storage case.

Replacement clear plastic parts (not autoclavable).
21-440 Replacement plastic attachments, 4 nasals and 4 temporals.
21-440N Replacement plastic attachments, 10 nasals.
21-440T Replacement plastic attachments, 10 temporals.
21-536 Spare black elastic headbands (5)
21-537 Spare white elastic headbands (5)
